PROFILE

I am Yuanming Wu, a Master of Information Technology candidate at UNSW, with a Bachelor's degree in Communication Engineering from Shenzhen University. Currently, I am an IT Web Development Intern at Award Global, where I contribute to webpage design, troubleshoot technology issues, monitor backup systems, and upgrade network equipment and workstations. I am proficient in Python, Shell Programming, and skilled in front-end web development using ReactJS, and NextJS. Additionally, I have experience in Rust programming. Some of my project highlights include developing a professional social networking platform, creating websites, and implementing Rust games and other softwares. I possess strong communication skills, problem-solving abilities, and excel in teamwork, adaptability, and attention to detail.

WORK EXPERIENCE

IT Internship (Web Development)

Award Global   Apr. 2023 - July. 2023

- Webpage design and development.
- Assist in troubleshooting technology issues. ✶ Monitor backup systems.
- Help with upgrading network equipment.
- Help with upgrading workstations.
- Implementing software systems.
- Providing support in the form of procedural documentation.
- Assist in organization and maintaining IT resources.
- Managing multiple cases at one time.
- Installing and configuring hardware and software.
- Consulting with IT managers and other departments as required.

PROJECT EXPERIENCE

- **"Global Pay" Website**: Developed and deployed the "Global Pay" website using NextJs + Javascript + CSS + HTML + Git (group work).
- **"Big- Brain" Website**: Developed the front end for a professional social networking platform "Big- Brain" similar to Kahoot using ReactJs + Javascript + CSS + HTML.
- **Rust Terminal Game**: Implemented an "adventure" style 2D game in the terminal using Rust.
- **Rust IRC Server**: Implemented a Rust IRC Server.
- Implemented a subset of the version control system Git using Shell Scripting.
- Implemented a subset of the important Unix/Linux tool Sed using Python.

PERSONAL TRAITS

- Strong communication and interpersonal skills and can communicate with technical and non-technical stakeholders.
- Demonstrated ability to solve problems through process analysis to successfully manage and find solutions for complex and unexpected situations.
- Good team player, actively listens to team, respects their ideas and aims to improve the product or process at hand, by actively contributing to team tasks to meet project goals.
- Self-motivated, resilient and has the capacity to work under pressure to complete tasks with excellence to meet deadlines.
- Attention to details, proficient in quickly learning new concepts, and has the ability to adapt to new environments or situations.
